Óscar A. Montiel — Mid-Senior Front-End Developer

animanoir.xyz · **LinkedIn** · **GitHub** · etherealflux94@gmail.com — Querétaro, MX — +52 442 145 8909

Mid-Senior Front-End Developer specializing in **React and modern frameworks (Astro, Next.js).** Experienced in building **scalable, high-performance applications with seamless API integrations.** Skilled in **driving innovation through optimized workflows,** agile methodologies, and the **adoption of emerging technologies to deliver future-proof solutions.**

Professional Experience:

Aug. 2020 → November 2024 – Application Developer & Infrastructure · P/S/L Group.
- Developed and maintained reusable React components for flagship products (NTK, DocGuide, HABC), leveraging Redux/Sagas for backend communication. Designed robust UI elements that enabled seamless integration across multiple products, reducing development time and improving team efficiency.
- Proposed and integrated new productive tools, significantly enhancing communication between developers and designers, increasing workflow speed.
- Employed **Jira** ticket system for **effective workflow management** and teamwork communication, **ensuring smooth project progression and alignment with management objectives.**

Jun. 2020 → ∞ – Founder and Lead Developer · metaxis.digital
- ★ **Founded and led metaxis.digital**, an open-source platform blending philosophy and futurism, growing it to frequent monthly users. **Designed and implemented** the platform using **Gatsby. Leading the migration to Next.js,** improving site performance and enhancing user experience.

Jan. 2019 → Aug. 2020 – Web–Product Developer · NUUMX
- ★ Developed and maintained custom websites for clients using Webflow, delivering tailored solutions to meet specific needs. **Built specialized software with React,** improving functionality and user experience. Streamlined internal workflows by introducing a new ticket management system, enhancing collaboration between design and development teams.

Jan. 2019 → Aug. 2020 – Software Engineer · Grupo Educare
- ★ Created interactive e-books for educational purposes using HTML, CSS, and JavaScript, improving engagement and learning outcomes. Advised on emerging technologies and their application in education, upskilling the team and driving innovation in product development.

Technical Skills:

Frontend Development:, React Ecosystem (Redux, Saga, Styled Components), UI/UX: Tailwind CSS, Storybook. **Frameworks:** Astro, Gatsby, Webflow, Next.js. **Testing:** Jest, React Testing Library. **Languages:** TypeScript, JavaScript. **Backend & Infrastructure:** Node.js, AWS Services, Netlify, Vercel. **Tools & Methodologies:** Jira, Zeplin, Git/GitHub, Agile Development

Education: **Bachelor's Degree in Software engineer,** UAQ — **English:** Professional proficiency (TOEFL) — For certifications available on my LinkedIn profile.
